

An Alien's Perspective

By Zort

Greeting and salutations from the planet Gemma, this is my report to humanity. We have been watching you for over 200 years now and what we see is very disturbing and yet there is real hope to be found through The Way.

We find it very strange that humans live in separate countries and act like each individual country is their own separate planet. Humans are all the same deep down living on one tiny planet and yet they focus on their differences instead of their commonalities which cause wars and division and much sorrow and misery.

Humans place want and need over charity and love, they want desperately to be loved and yet they seem to not want to first give that love to others. Humans chase after money and fame and power, they seem to want instant gratification over relieving the pain and suffering of others. Humans think they are good and yet their planet and their lives are a mess.

They spend more money and resources building weapons of war instead of building bridges of peace, hope and love. We have watched over the past 200 years, we have seen the wars, the greed and the sufferings of mankind, we have watched as your water and your land and your air have been polluted and exploited we have watched as other life forms are exploited and abused and enslaved for profit out of greed.

We have watched as millions of the unborn were butchered, we have watched as your elderly and sick were abandoned and taken advantage of. We have watched as society would rather build up buildings made of brick, steel and mortar than build up humanity through forgiveness, kindness, compassion and love.

You are now entering into a new phase of space exploration, stay in your own solar system or meet your fate your kind is not welcome in the rest of the universe your selfishness, greed and your evil ways are a threat to other worlds and civilizations. Until you learn to live in peace and harmony on your own planet and learn how to manage the earth's resources and learn how to live in peace with forgiveness, compassion, kindness, charity and love than say home this is your only warning!!!!!!!!!!

Ps. O, there is Good News, there is hope through Christ the Lord He visited our planet too and we listened and obeyed His teachings and we all are better off for it. O we forgive you and we love you but please stay home until you get your act together or it's later dude...

Peace out; Zort..... John 14:27
